Kolkata, West Bengal | abidulofficial@gmail.com | +91 99324 11910 | www.linkedin.com/in/abidul-islam-0001a2295 | https://github.com/abidul78

PROFESSIONAL SUMMARY

Backend Developer with hands-on experience building and deploying web applications using Python, Django, Django REST Framework, and PostgreSQL. Strong foundation in Data Structures and Algorithms. Experienced in secure authentication, role-based access control, REST APIs, database-driven applications, and production deployment. Focused on building reliable, maintainable, and scalable backend systems.

TECHNICAL SKILLS

Languages: Python, Java (Basic), JavaScript, SQL, HTML, CSS

Backend: Django, Django REST Framework, Flask, RESTful APIs, CRUD Operations, Authentication (JWT, Sessions)

Frontend: HTML, CSS, JavaScript, Bootstrap 5

Database: PostgreSQL, MySQL, MongoDB, SQLite

Tools & DevOps: Docker, Git, GitHub, Linux, Postman, Render, Gunicorn, WhiteNoise

EXPERIENCE

Software Development Experience

Developed backend-focused web applications using Python and Django, built CRUD-based projects following modular and clean-code practices, implemented REST APIs and database integrations, and used Git and GitHub for version control. Tested APIs with Postman, debugged application issues, and deployed a Django application with PostgreSQL on Render.

PROJECTS

JobPortal - Recruitment Platform (Python + Django + PostgreSQL) | [Live Demo](#)

Built and deployed a full-stack recruitment platform with separate Job Seeker and Employer roles. Implemented job posting, search and filtering, resume upload, applicant profiles, duplicate-application prevention, pagination, and application-status tracking. Developed an employer dashboard to review applicants and update statuses. Deployed on Render using PostgreSQL, Gunicorn, and WhiteNoise.

Deal Vault - Escrow Transaction Platform (Python + Django)

Built a RESTful backend using Django and Django REST Framework with JWT authentication and role-based user management. Developed APIs for deal creation and acceptance, transactions, fund release/refunds, disputes, and analytics. Tested endpoints with Postman and managed source code using Git and GitHub. Tech Stack: Python, Django, DRF, JWT, SQLite, Git, GitHub.

Weather App (HTML, CSS, JavaScript)

Developed a responsive weather application using HTML5, CSS3, and JavaScript (ES6). Integrated the OpenWeatherMap API for city-based real-time temperature, humidity, and wind-speed data, with a clean responsive interface. Tech Stack: HTML5, CSS3, JavaScript (ES6), OpenWeatherMap API, Git, GitHub.

CERTIFICATIONS & ACHIEVEMENTS

- **Algorithms for Searching, Sorting and Indexing** - University of Colorado Boulder
- **Introduction to Artificial Intelligence (AI)** - IBM
- **Generative AI: Introduction and Applications** - IBM
- **Think Again I: How to Understand Arguments** - Duke University

EDUCATION

B.Tech in Computer Science

Sister Nivedita University

Class XII

Aruar B.M.D.P Institution

Class X

Mahata High School
